

# Sustainable Corporate wear

Made in Estonia 

# ABOUT US

## COMPANY

iLLIMOR is a sustainable and carefree clothing brand with an ultimate goal to offer its clients refreshing **more-than-just-clothes** experience. The brand was founded in 2020 and grew out from the idea of creating new values by **upcycling textile** industry leftovers and promoting **innovative eco-friendly** fabric such as Tencel™. At iLLIMOR, we praise the importance of circular economy and reflect it in our core values. That is **finding a right balance** between a comfortable design, environmental sustainability and social responsibility. iLLIMOR is located in Tartu, Estonia.

## SUSTAINABLE WORKWEAR

iLLIMOR is extremely enthusiastic about sustainable workwear and wish that Your valuable employees would also wear an **environmentally friendly work outfit**.

Sustainable workwear does not only contribute to a **better business reputation**, but also creates an image of trust with Your customers, if You let them know about Your attempts to **make the world a better place**.

Since we believe that there is no Planet B, we have chosen to produce most of our workwear products from Tencel™ - certified biodegradable eco-material that is known for its environmentally responsible production process.

**"We wish to make Your company more sustainable, so that You can contribute to a better living environment for everyone."**

# TENCEL™

**Naturally biodegradable**

**Uses 98% less water  
compared to conventional cotton**

**Fibers produced via  
closed-loop process**

**Manufactured in Estonia  
with OEKO-TEX standard**

# TENCEL™

Feels so right

## ORIGIN

TENCEL™ is a flagship brand name for a textile fibre developed by Austrian company Lenzing AG. In order to produce TENCEL™ fabric the fibres are firstly spun into a yarn and yarn into a fabric. iLLIMOR sources its TENCEL™ fabric from Estonian textile manufacturer Qualitex AS, located in Sindi Estonia.

## PRODUCTION PROCESS

TENCEL™ cellulosic fibers of botanic origin define a new standard of sustainability and natural comfort for you, transforming fabrics to ensure their suitability to everyday consumer needs. TENCEL™ Lyocell fibers are extracted from sustainably grown wood using a unique closed loop system which recovers and reuses the solvents used, minimizing the environmental impact of production.

QUALITEX AS production standards:

## FEEL GOOD WITH A NATURAL TOUCH

TENCEL™'s unique physical properties lead to their high tenacity profile, efficient moisture management and gentleness to skin. TENCEL™ is naturally soft to touch and offers long-lasting comfort. Moreover, TENCEL™ lyocell fibers absorb moisture efficiently, providing less favorable environment for bacterial growth.

**SUSTAINABILITY**  
Naturally biodegradable

**FABRIC**  
Produced in Estonia  
with OEKO-TEX standard

**ORIGIN**  
Botanic product derived from  
renewable source

**WOOD**  
From sustainably  
managed forests

**FIBER**  
Closed loop production,  
>99% recovery of solvent

**PROPERTIES**  
Naturally soft  
Enhanced breathability  
Stronger than cotton

©2021 Aparaaator

Style 2062

Style 0101

## Aparaator Creative Space

Aparaator Creative Space is a film and photography studio in Tartu. Long days behind-the-scenes and countless hours of post-production assume comfortable, lightweight and breathable clothing that would resist frequent laundering.

Guys at Aparaator like the all-in-black minimalistic style and opted for a black Tencel hoodie 2062 with a simple branded embroidery. As they often work outside with cold weather, the black Tencel scarf/mask is a necessary accessory giving the ultimate finishing touch to the entire uniform.

©2021 Crafter's Gin

## Crafter's (Liviko AS)

Crafter's Artisanal Gin is known for the beautiful craftsmanship in distillation with the fine-tuned unique botanical fingerprint. As the brand is inspired by the wild Nordic forests, fertile land and zero waste philosophy, they expect their workwear to be aligned with the same values.

The concept of Crafter's Bar uniform is based on the circular philosophy and styled according to brand colours. It is an ideal example of re-using deadstock materials and adapting the initial design to what is already available as waste. Crafter's Gin dresses and shirts have an oversized cut for the ease of movement when preparing their customers the best fine-tuned artisanal gin in the world.

©2021 Garage48

## Garage48

Garage48 is startup hackathon series turning brilliant ideas into a working prototype in 48 hours. Having accomplished 220 hackathons in 26 countries and built nearly 800 prototypes, Garage48 team is unstoppable with the only goal to enrich the startup ecosystems across the globe from a grassroots level.

In order to live up for their noble goal, Garage48 team was looking for diverse and recognizable uniforms that would emphasize the sustainability they strive for themselves. Tencel fabric, known for its environmentally responsible production process, was therefore a match made in heaven for Garage48 expectations. Playing around with different styles and colors led to unique design concept, aligning perfectly with the vibrant entrepreneurial community where Garage48 operates.
